*The Bridges of Madison County*

The book I read is *The Bridges of Madison County*. The author is Robert James Waller.

The book contains 171 pages and I have read it all. It's a novel.

The main characters are Robert and Francesca.

Robert is 52 years old (1965) and he works at the paper National Geographic. He is a very nice man but he is divorced since nine years. His biggest interest is to take pictures. His next job is to take pictures at the bridges of Madison County. When he arrives he meets Francesca. Francesca is a housewife, she has two children (Michael and Carolyn) and a husband, Richard. She is 45 years old (1965)

When Robert Kincaid arrived to Madison County, Iowa, he couldn't find the bridges... He asked Francesca for the way that's when they met the first time.

After a couple of days Francesca and Robert fell in love. Richard, Michael and Carolyn were out of town.

They had a wonderful time together but the day came, Robert has to go home. He asked Francesca if she wanted to follow him back. It's a hard decision for her but she says no, she can't leave everything, Richard, Michael, Carolyn, no she can't

Robert went home by himself and Francesca never talked of him again. Until ...., Richard has died and Michael and Carolyn has grown up. Before Francesca dies she writes a letter to Michael and Carolyn. In the letter she tells them about Robert, her biggest love ever. When the letter is finished she dies.

Her ashes were spread over the Roseman Bridge, where Robert took a picture of her, a long time ago.

The story takes place in 1965, except the last part with the letter, that's in 1989.

The place is Madison county, Iowa, most at the bridge, Roseman Bridge, but they are also at Francesca's home. Francesca has a problem, she is married and has two children so she can't follow Robert back. The solution ends that she stays home.

The end is according to me, good and bad, I think that she should go back with Robert at the same time, Richard and the children should be devastated. She loves Robert but she stays with Richard. That's both good and bad and the end is realistic.

The language was difficult, the whole book was pretty hard to read, actually. The order of telling the story were pretty hard to get because at first it's in 1989, then in 1965 and in the end back in 1989.

I think it's a girlbook, because there are much feelings and love in the book. I think boys wouldn't like it because of all the love.

My vocabulary has become larger since I read the book, I think. I think that I ded a good choice of book. I liked it though it was tough. It was hard.

*Well done, Anna. I am sure you have learnt a lot. I hope you will find a book as good as this one next time, too. Now, please, correct your mistakes.*
