

Helping the student

- Help the student to plan enough time for the English lesson.
- Go through the teacher's instructions together.
- Help the student to divide the time between listening, reading, writing and speaking.
- When practising speaking at home the student can:
 - speak to a person at home
 - record themselves in the digital *Pronounce*-exercises
 - talk to a mirror or a mobile camera
- Try to support **and** challenge the student. Don't forget to give positive feedback!
- Don't worry too much about the details. The most important thing is that the student carries on practising and developing his/her English skills.
