## Funny-looking animals

Have you seen these funny-looking animals before?

The first animal lives in the deep, deep sea.

It is called a blobfish.

It has very few muscles and looks a bit like jelly.

The second animal lives in the swamps.

It is called a shoebill.

Its beak looks like a wooden shoe.

The third animal lives in the jungle.

It is called an aye-aye.

It picks out its food from trees using its long, thin middle finger.

They all look funny.

But some people think they look ugly.

What do you think?
